To: Chairman Randy Tobler & MVWD Board of Directors
From: Joseph Davis, General Manager
Date: July 29, 2021
Subject: Well Head Protection Plan Update

Background:

The Clean Water Act requires all activities associated with water pollution problems be planned and managed through an integrated area-wide water quality management program.

The Districts Well Head Protection Plan (WHPP) also referred to as source water protection was last updated in 2005. Staff has been working with Kelli Nevills a source water specialist with Nevada Rural Water Association and Kim Rigdon an Associate Engineer with Nevada Division of Environmental Protection on updating the plan and identifying potential hazards in and around the districts water resource facilities.

Staff has invited both representatives to attend the August 12th Board of Directors meeting to discuss source water protection as well as answer any questions concerning the update process.
