To: Chairman Ken Staton & MVWD Board of Directors
From: Joseph Davis, General Manager
Date: November 22, 2016
Subject: Purchase On-Site Sodium Hypochlorite Generation System

Background:

The District recently solicited bids from three On-Site Sodium Hypochlorite Generation System suppliers. The Contract Documents and bid process was administered through Bowen Collins & Associates; The District received 2 Bids by the November 10th dead line.

De Nora	\$99,800.00
PSI	\$112,000.00
OSEC	No Bid

The FY 2017 Budget anticipated \$100,000 for this capital improvement project, with \$85,000 slated for the purchase of the unit and \$15,000 in incidental costs. Bowen Collins and Staff have conducted a cost analysis of the higher than anticipated bid unit cost and have attributed it to added specification requirements the District requested.

Anticipated budget short fall is offset through favorable purchases on the Arrow Canyon Gen-Set, Capital Improvement Plan, and Vehicle purchase.

Suggested Motion:

Move to accept the bid from De Nora Water Technologies Texas, LLC in the amount not to exceed \$99,800.00 for a ClorTec On-Site Sodium Hypochlorite Generation System.
