To: Chairman Kelby Robison & MVWD Board of Directors
From: Lon Dalley, Assistant General Manager
Date: August 1, 2024
Subject: Moapa Valley Water District Lead Service Line Inventory Update

Background

On January 15, 2021 EPA released the Lead and Copper Rule Revision which included the Lead Service Line Inventory mandate. This mandate requires all water systems to take action to address a significant source of lead in drinking water, first step is creating an inventory of all service lateral lines to verify the location of lead service lines. This requires a lot of research and even physical verification by field crews at some locations. This Lead Service Line Inventory is due October 16th 2024. MVWD is currently 88% completed on our inventory list.
