Subject: Variable Frequency Drive Purchase

Background

The Variable Frequency Drive that controls Arrow Canyon #1 is beginning to underperform and showing signs of potential failure. This variable speed drive is essentially the brain that controls the pump and motor.

As with all electronics, there is limited prior notice before failure. Staff did not anticipate having to replace this variable speed drive during this current budget cycle. However, with a lead time of over 15 weeks for delivery, staff felt it was prudent to act on purchasing a new drive.

Staff through Wheeler Electric solicited bids from 2 vendors DYKMAN and CODALE/NEDCO Electric.

CODALE/NEDCO Electric	\$36,140.00
DYKMAN	\$33,571.45

Staff is in the process of reviewing both bids and will have a recommendation ready at the August 14th Board of Directors meeting

Suggested Motion

Move to ratify the purchase of a variable speed drive from Wheeler Electric in the amount not to exceed \$33,571.45 Dollars
