Subject: Arrow Canyon Arsenic Media Cleansing/Rejuvenating

Background

Staff reported to the Board at the last meeting on the need for replacement of the arsenic media at Arrow Canyon. Staff have been looking into the option of cleaning the media in place at a much lesser cost than full replacement. Staff have been in discussions with Blue Earth Products who perform this proprietary process and have received a quote for the cleansing/rejuvenating of two vessels at Arrow Canyon. The District is required to pull arsenic samples quarterly, the last quarterly sample came back on the high end, and due to time constraints before next samples are due, staff needed to move forward with approving the quote from Blue Earth to get the process started in time to have it completed before the next quarterly samples are due. Blue Earth has instituted a price increase since an original quote and receiving this "updated" quote, but they are willing to honor the original quoted price. If this process is successful, it could be a big savings for the District.

Suggested Motion

Move to ratify the approval of the acceptance of the quote from Blue Earth Products for cleansing/rejuvenating of the arsenic media at Arrow Canyon in the amount of **\$42,070.64**
